

PennHIP Report

Referring Veterinarian: Dr Steven Diehl
Email: sdiehl@montecitovets.com

Clinic Name: Montecito Veterinary Center
Clinic Address: 175 Rennell Drive Suite A
Southport, CT 06890
Phone: (707) 539-2322
Fax: (707) 539-2158

Patient Information

Client: ALBOR, Ventura
Patient Name: PEPPER 991001911048705
Reg. Name:
PennHIP Num: 170821
Species: Canine
Date of Birth: 31 Aug 2019
Sex: Female
Date of Study: 17 Mar 2022
Date of Report: 22 Mar 2022

Tattoo Num:
Patient ID: 41935
Registration Num:
Microchip Num: 991001911048705
Breed: BRAQUE D'AUVERGNE
Age: 31 months
Weight: 47.6 lbs/21.6 kgs
Date Submitted: 17 Mar 2022

Findings

Distraction Index (DI): Right DI = 0.44, the left DI was not computed.

Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**

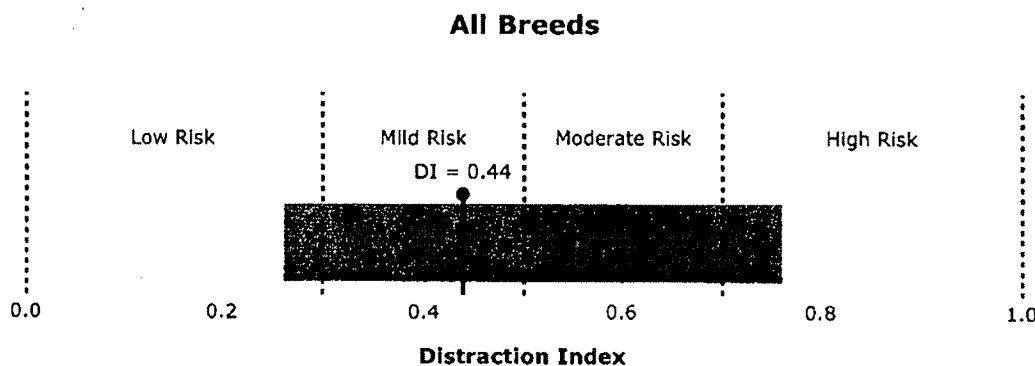

Cavitation/Other Findings: Cavitation was present on the left hip. Cavitation is harmless to the hip, however it can artificially and temporarily increase the distraction index. Therefore, no laxity score is provided for the left hip.

Interpretation

Distraction Index (DI): One hip cannot be used for the laxity ranking (see Findings). The opposite hip will be used in the analysis. The value of the DI is 0.44.

OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.

Distraction Index Chart:

BREED STATISTICS: There are insufficient numbers of the BRAQUE D'AUVERGNE breed in the AIS PennHIP database to permit a breed-specific ranking. Therefore, the patient is ranked based on the hip laxity of all dogs in the database representing all canine breeds. The gray strip represents the central 90% range of DIs (0.26 - 0.76) for all canines in the database. The species average DI is 0.48 (solid square). The patient DI is the solid circle (0.44).
